

# CRETEFOAMER™

Cellular Concrete Foaming Systems

## CFP2-1G

One Gallon Per Minute Output

Internal Battery Powered

Two Gallon Tank Capacity

**Simple to Use**

**Field Proven Reliability**

The smallest version of the CreteFoamer™ product line. The CFP2-1G is ideal as a lab batch or small project cellular concrete foam machine. Producing one gallon of foam per minute, the CFP2-1G provides dense and consistent foam quality at an affordable price. Powered by an internal rechargeable 12 volt battery, this model will operate several hours between charges. With this unit and a two cubic foot mixer you can quickly learn about cellular concrete.

Additional models available:  
1, 2, 8, & 20  
cubic feet per minute

[www.cretefoamer.com](http://www.cretefoamer.com)

Water and foam concentrate are pre-mixed in the two gallon tank, which will make about one cubic foot of foam between fills. The CFP2 generates a thick foam with the easily serviced Foamhead™ foam generator.
